

Ethics and Technology Minor Application

Name:	Student ID:
Email Address:	Phone:
Major (prospective):	Anticipated Graduation Date:
Academic Advisor:	How did you hear about the minor?

1. Attach a one page narrative describing what knowledge and skills you hope to gain from the minor.
2. Complete the chart below to the extent possible, including courses you plan to take. Don't worry, you may (should!) update this chart quarterly as your plans progress.

The Ethics in Society Ethics and Technology Minor requires six courses for a minimum of 25 units. All courses must be taken for a letter grade. Courses credited to the Ethics in Society Ethics and Technology Minor may not be double-counted toward major requirements. There is an exception for Engineering majors who may double-count CS 182/CS 182W for their Technology in Society requirement.

**Foundational Courses**

Course Number	Course Title	Qtr/Year	Units	Grade
ETHICSOC 182	Ethics, Public Policy and Technological Change			
ETHICSOC 20 <b>OR</b> ETHICSOC 171	Intro to Moral Philosophy / Justice			
One ETHICSOC Elective at the 100 level or above				

**Three Ethics and Technology Electives**

Students are required to supplement the foundational courses with three additional electives. These courses cover various topics in technology, human values, and social innovation from an interdisciplinary perspective and are drawn from across the university. The list of approved classes, found on the Ethics in Society web page, is updated regularly and students are invited to petition the program director to add a course that is not currently listed and coheres with the aims of the minor.
